THE LEADER IN CHROME PLATING

OVER 75 YEARS OF SERVICE

As a leader in Electroplating, U.S. Chrome has been defining quality, precision and innovation in the plating industry.

Our proprietary plating processes allow us to deliver a finished product faster and ensures a quality product every time.

Our investment in research and development has always set us apart from our competitors.

U.S. Chrome of New York is one of five locations servicing North America. For three generations, our focus has been on the practice of engineering and applying industrial hard chrome plating.

Engineering Partnerships That Outperform
